

# Heat-Resistant Energy, Built to Endure

## HL18650T

### Extreme Temperature Range

**-40°C to 85°C**

Operates from -40°C to 85°C with stable output, perfect for harsh environments.

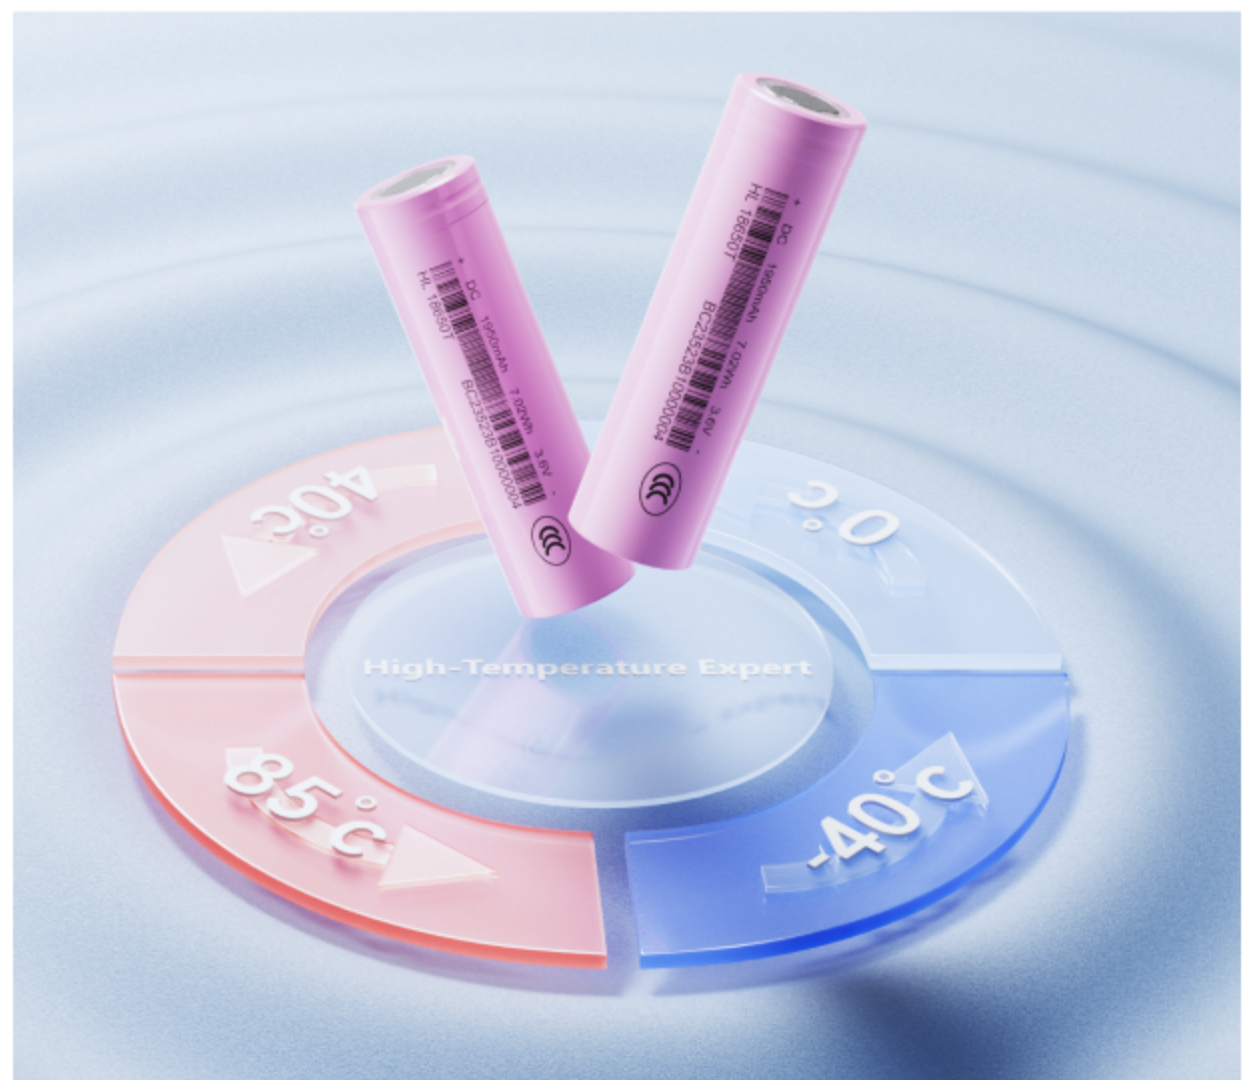

### High-Temperature Stability

Retains over 90% capacity after 48 days at 80°C for reliable performance.

### Reliability under vibration

Performs stably under high-frequency vibrations, ideal for automotive, drones, and military devices.

High-Temperature Expert

40°C, 85°C, -40°C

Retains over 90% capacity after 500 cycles, ensuring long-term reliability.

**90%**

Delivers 3.9V/6W at -30°C, even after high-temperature storage.

**-30°C**

Supports 5C continuous discharge, meeting high-power application needs.

**5<sub>C</sub>**

# Product Specifications

## HL18650T

### Dimension

Diameter ..... 18.3±0.2mm

Height ..... 64.9 ± 0.3 mm

### Capacity

Min capacity (0.2C) ..... 1950 mAh

Typical capacity (0.2C) ..... 2000 mAh

### Voltage and current

Nominal voltage ..... 3.60V

Working voltage ..... 2.75V-4.20V

Max charge /  
discharge current ..... 1.95A / 10A

### Working temperature

Charge ..... -20~60°C

Discharge ..... -40~85°C

### Other

Cycle life ..... > 300

-40°C capacity (0.2C) ..... ≈ 60%

Recovery capacity  
after 1000h 80°C aging ..... > 90%

Excel in Extreme Heat and Cold:  
Unmatched Performance.

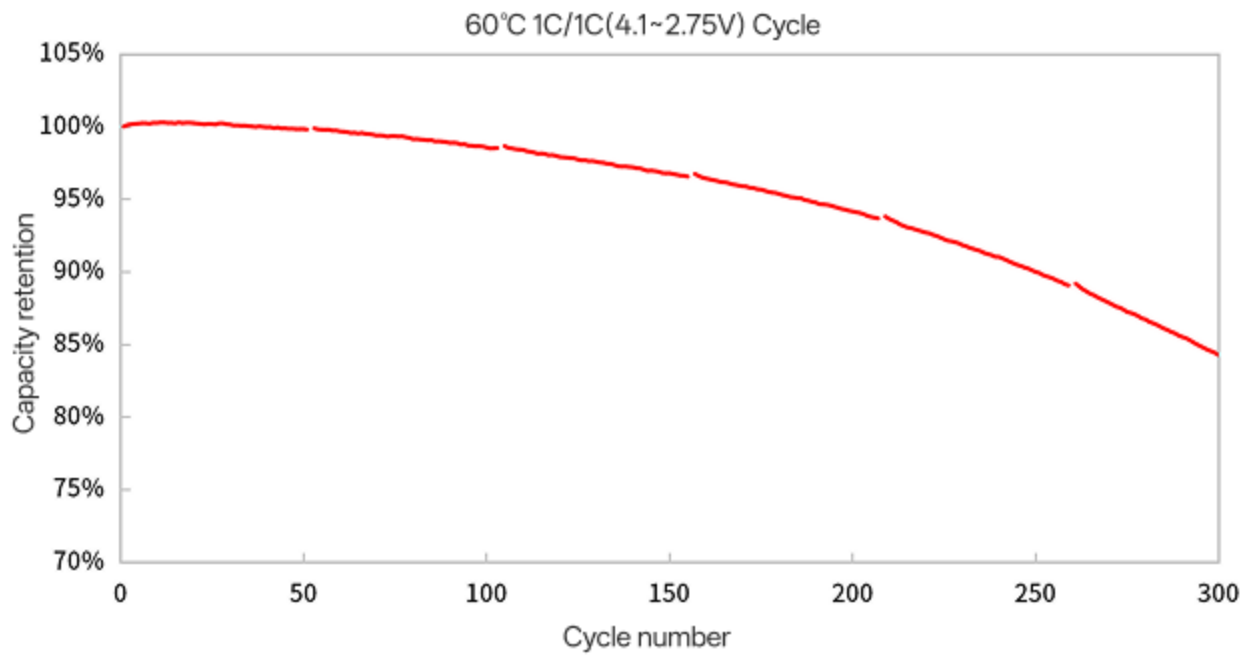

### Rate discharge

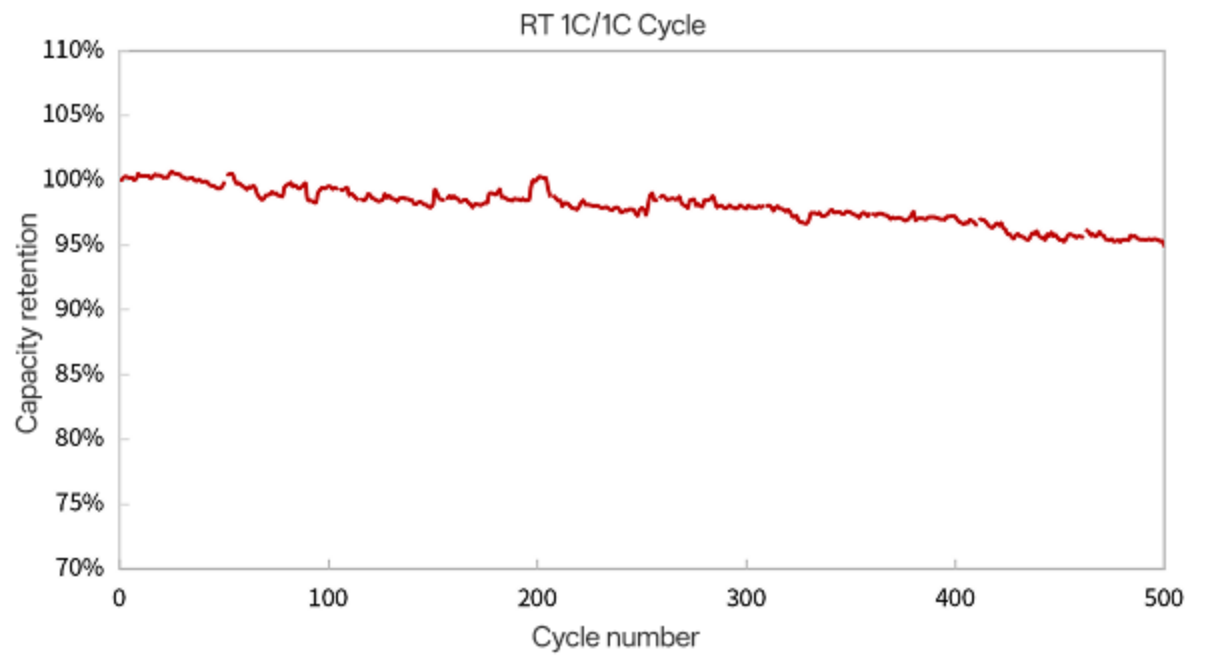

### Discharge curve@different temperature

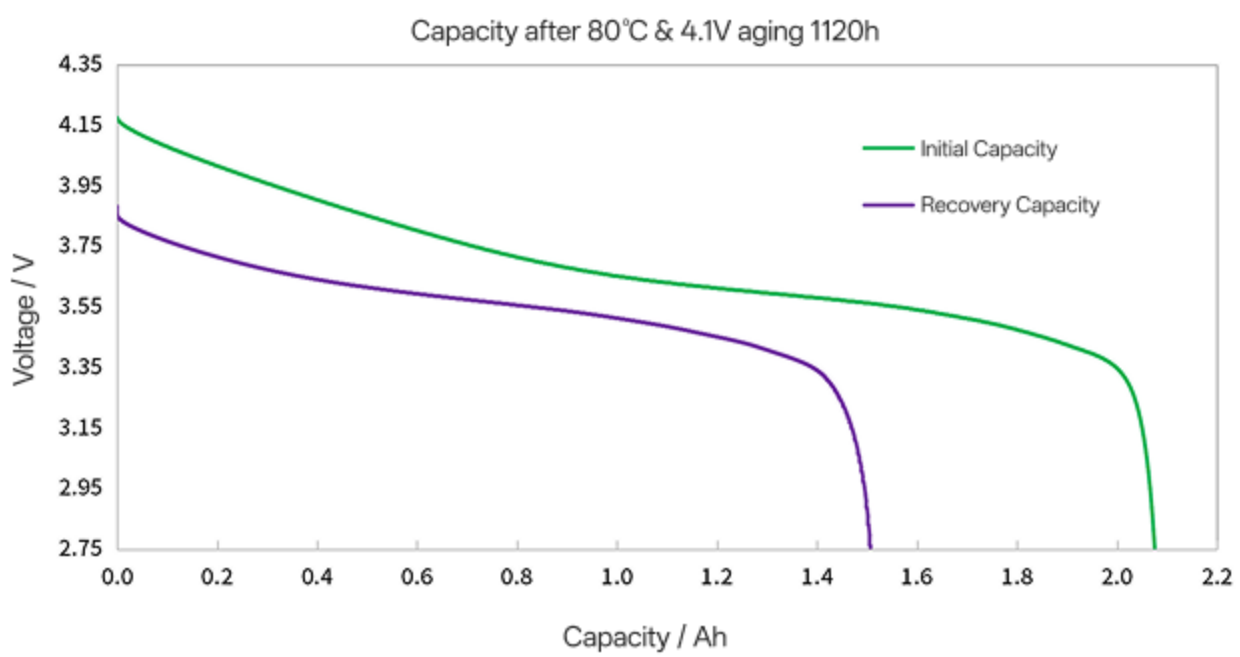

### Cycle at high temperature

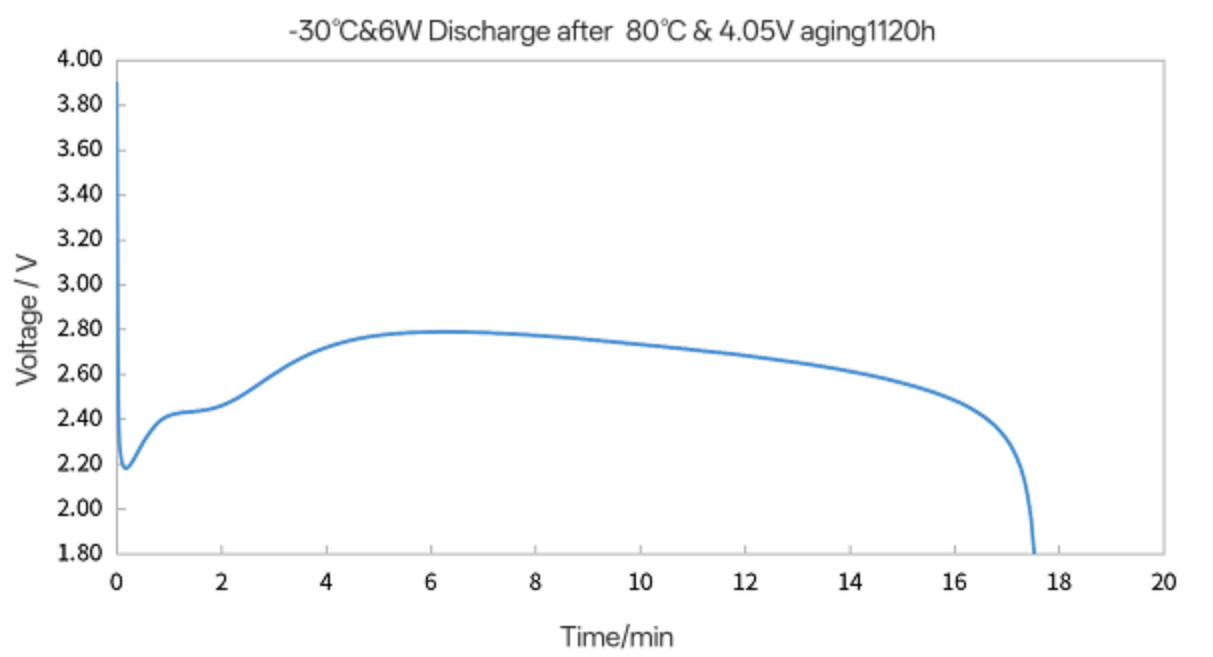

### Cycle at room temperature

### 80C&4.05V

### Low temperature discharge after the end of life

# What we're enabling with HL18650T

## Reliable Power for Automotive T-Box

Automotive T-box systems require stable power in extreme temperatures and under vibrations. The HL18650T battery ensures seamless connectivity and efficient operation in the toughest conditions.

## Optimized Power for GPS Tracking

Logistics GPS trackers require stable power for precise tracking in harsh environments. The HL18650T battery supports continuous operation to optimize fleet management and delivery efficiency.

## Reliable Energy for Military Satellite Phones

Military satellite phones demand stable power in extreme environments to ensure uninterrupted communication. The HL18650T battery provides dependable energy for mission-critical operations in challenging conditions.
